Comprensión de textos

Responde las preguntas de acuerdo con el siguiente texto.

Marca **A**, **B**, **C** o **D** en tu hoja de respuestas.

Tornadoes

Tornadoes are a type of weather, one of the most violent and powerful. They consist of a column of air that spins and usually forms a funnel shape. They have high speed winds that can break apart buildings, knock down trees, and even toss cars into the air.

When we talk about tornadoes, we are usually talking about large tornadoes that occur during storms. However, it takes more than just a storm to cause a tornado. There are other conditions in the formation of a tornado.
